

AMENDMENTS TO THE SPECIFICATION

Applicant respectfully requests that the Examiner approve the following changes to the specification. These changes are to correct minor typographical errors.

At Page 16, Line 5, a portion of the text reads "...to the second trading partner 131 (in this case the buyer). n those embodiments". This section of text should read "...to the second trading partner 131 (in this case the buyer). In those embodiments". A letter "I" has been added to correctly spell the word "In".

At Page 19, Line 19, the line of text starts "change business activity or a failure at a local hub." This section of text should read "change in business activity or a failure at a local hub." The word "in" has been added to provide the correct grammar.

At Page 22, Line 9, the line of text starts "forming step 115 so as to parse the message..." This section of text should read "forming step 415 so as to parse the message..." The text is now consistent with its intended description of Figure 4.
